Foreword

This volume, jointly edited by the Department of Cultural Heritage: Archaeology, History of Art, of Music and Cinema of the University of Padova, and by ISMEO-The International Association for Mediterranean and Oriental Studies, Rome, ideally represents an ideal continuation of the joint commitment of Italian and Iranian archaeologists in the exploration of the prehistory and protohistory of Sistan, one of the most historically relevant cores of the Iranian civilization at the eastern edge of the Iranian plateau. Our late colleague Maurizio Tosi (1944-2017), the original investigator of Shahr-i Sokhta, and the first explorer of Tappeh Graziani, would certainly have welcomed the follow-up of the series he was thinking about, when almost 40 years ago he entitled a major collection of articles on the results of his research *Prehistoric Sistan 1* (1983a). To his memory, this contribution is respectfully dedicated, in the spirit of unbroken collaboration and consolidated friendship that has never stopped between Iranian archaeologists and Institutions and the Italian side.
